Relax your mind and energy

Do what you like, and enjoy the life

**Imported core components**

**Achieve medium and low temperature drying**

**Caring clothes with eco-efficiency**

Low temperature  
drying

Energy saving

Fluffy and soft

## STEAM SHAPING

### Spongy fabric automatically

The steam spray evenly penetrates the clothing fibers, and the patented motor high-frequency technology is used to smooth the traces of the clothing and reduce the wrinkles of the clothing.

△ High-end clothing is too much effort to take care of

△ Too busy to do the ironing

With one simple click, suits, jackets and other clothes that need to be managed daily can be specially cared for.

## PANTS LINE MANAGEMENT

**Emerge pants line,  
let you enjoy charming**

△ High-temperature irons can easily damage clothing materials

△ Trouble with high-grade materials

Using spiral jet technology, the steam evenly penetrates into each fiber, and the patented double-door elastic pressure plate is used to intelligently press the pants line with one button, which is suitable for more trousers of different widths and thicknesses.

## GENTLE DRYING

**Wake up the clothes and keep the fluffy texture**

- △ Clothes are damp and moldy in rainy seasons
- △ The clothes are deformed and faded in the scorching sun

The intelligent temperature control system realizes gentle three-dimensional drying at 56°C, keeps the drying temperature within a reasonable range at all times, reduces clothing damage, three-dimensionally awakens the collapsed fibers, and makes the clothing more fluffy and soft, like wearing a cloud on the body.

# EFFICIENT STERILIZATION

## Triple sterilization and removal of mites, double protection of your health

The body liner is specially added with silver ions, which can effectively meet the various needs of different clothes, effectively remove bacteria and mites, and care for the health of the family.

### △ Bacteria and mites causing skin problems

Built-in UV ultraviolet lamp, the whole cabinet is covered and irradiated, combined with steam and hot air high-temperature sterilization, triple sterilization mode effectively removes a variety of harmful bacteria.

99.99% UV  
sterilization rate

100% steam  
pasteurization

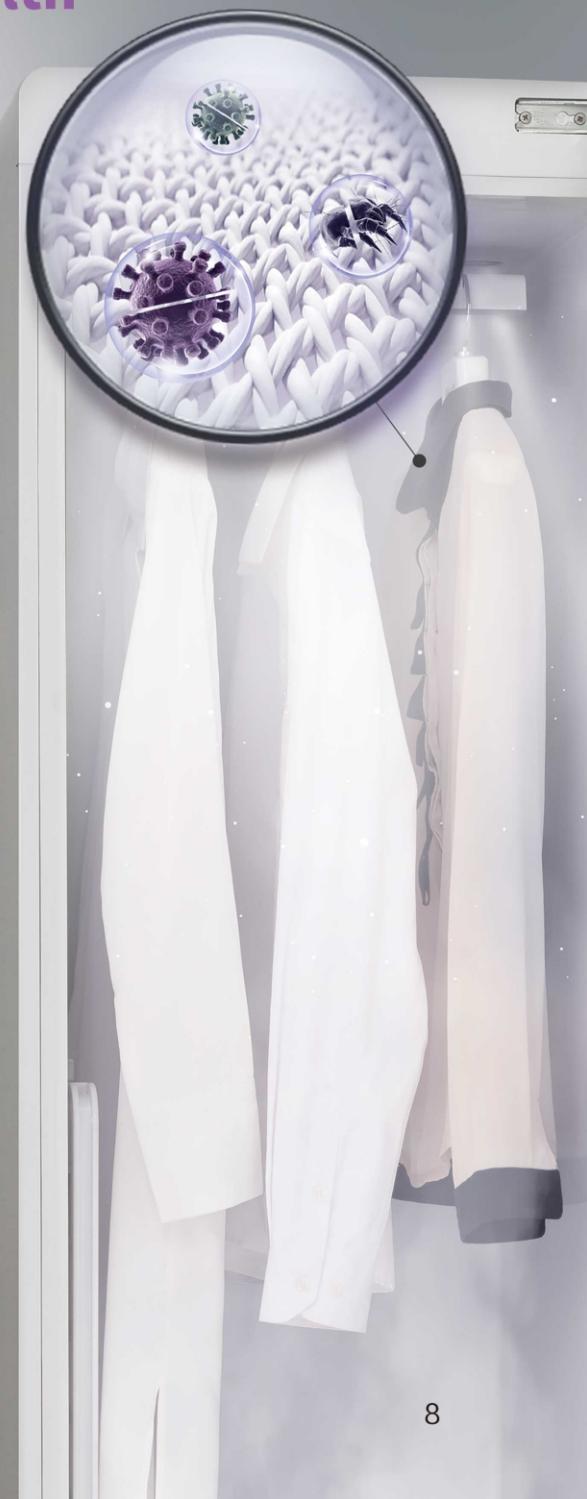

56°PTC hot air

### Test results of sterilization performance of clothing care machine

Test strain	Average sterilization rate (average of sterilization logarithm) (%)
Staphylococcus aureus(AS 1.89)	>99.99(4.20)
Escherichia coli (AS 1.90)	>99.99(4.16)

TESTING CNAS L0095:International Mutual Recognition Testing TESTING CNAS L0095

# MATERNAL AND INFANT FUNCTION

## Take care of your baby's health

For infants and young children, it effectively disinfects plush dolls, clothes, sheets, duvet covers and maternities.

- △ Stuffed toys are easy to breed bacteria and mites
- △ Inducing baby skin problems

Activate the maternal and child care mode, automatically turn off the aromatherapy function, let the baby get closer to the mother's taste, and also protect the health of the baby's skin.

Baby clothes

Bed linens

Toys

Maternities

# LEATHER CARE

## SPA for leather products

△ Leather clothes and products is prone to moisture and mildew

△ Annoying every time the season changes

After the treatment, the leather goods emit its own natural luster, so you don't need to spend time taking care of it, and you don't have to worry about grease residue.

Fast cleaning    Deep penetration    Moisture and mildew proof  
 Leather care    Soft luster    Long-lasting protection
